GEO. L. MESKER STEEL CORPORATION
EVANSVILLE INDIANA

THE SCOPE OF GEORGE

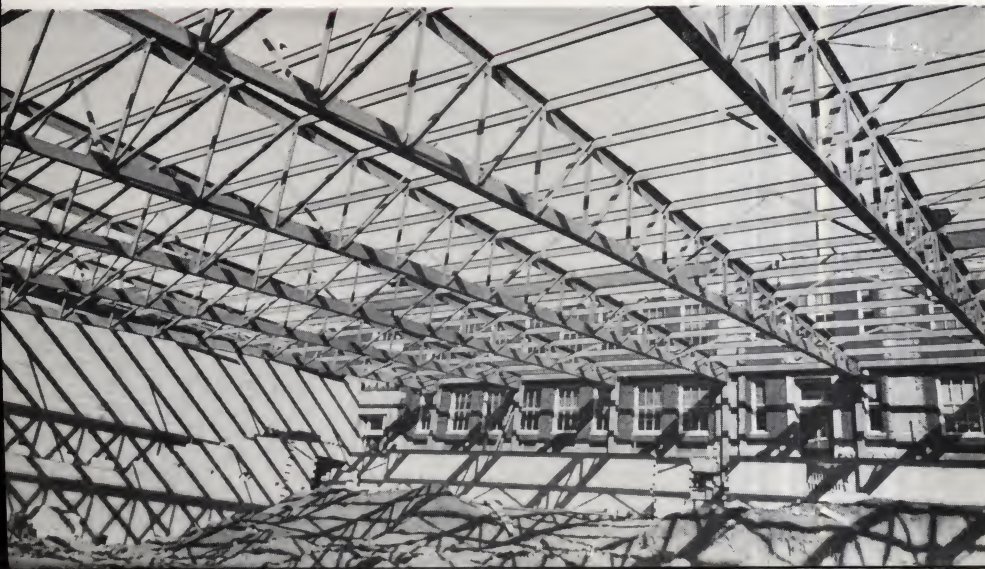

A Message From The President...

■ "In the following pages you will see the many phases of design and structural and ornamental steel fabrication for which Mesker has been known since 1879. The wealth of skill and imagination plus our diversified facilities can be put to work on your particular requirements at a moment's notice. We invite your inquiries."

Friedrich C. Schaefer

L. MESKER STEEL CORP.

SALES AND ENGINEERING

From a humble beginning in 1879 to the present 1958, a total of 79 years, Mesker Steel Corporation has steadily progressed into one of the largest steel fabricators in the Midwest.

Our Sales and Engineering Departments are comprised of experienced personnel, well-schooled in the traditionally high standards of Mesker procedures and alert to ever-changing conditions and new methods.

Our Shop facilities, constantly modernized down through the years, are geared to meet the details of all present-day techniques with expert performance and precision.

Your dealings with Mesker are backed by 79 years of experience and skilled know-how . . . your insurance of getting the best possible job at the most economical price. We invite your inquiries as we are anxious to serve you. No project is too small or none too large.

ENGINEERING DEPARTMENT

SALES DEPARTMENT

"Customers are 'sold' through design and manufacturing ability. Our sales engineers work closely with our skilled cost estimators.

"Step-by-step, they estimate time and material costs and recommend any modifications that will expedite production. Upon completion, they forward their job estimates to our executive board for final approval and competitive bid. This imaginative approach pays off with faster production . . . indicative that Mesker unquestionably possesses the facilities, experience and desire to work for you!"

W. J. "Smiley" Hoggatt
Vice-President
In Charge of Sales

MODERN EQUIPMENT

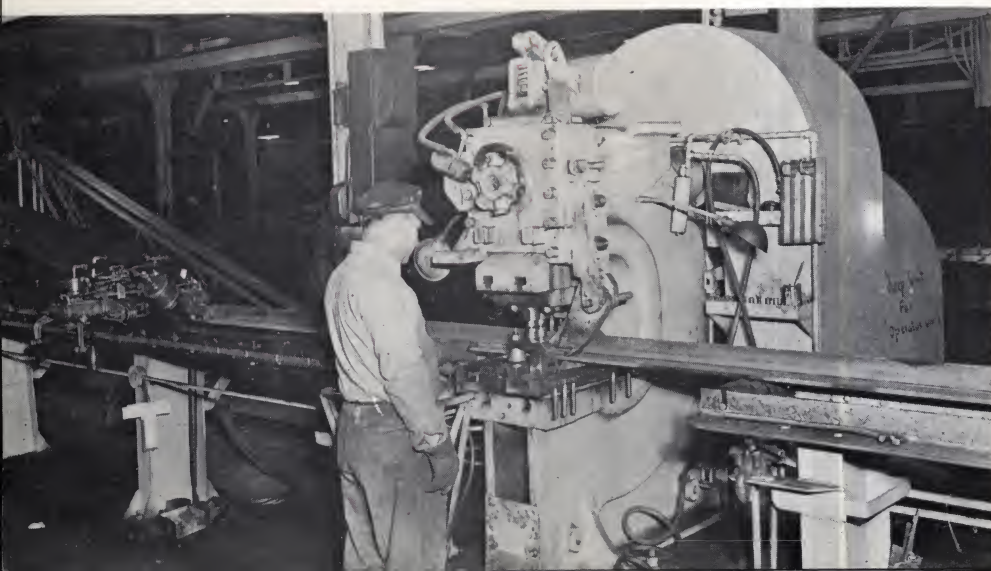

All Mesker equipment is of modern design and attuned to fast and accurate production, thereby expediting deliveries on your orders.

The machine pictured immediately below, eliminates individual layout, and center punching all angles and small beams and channels.

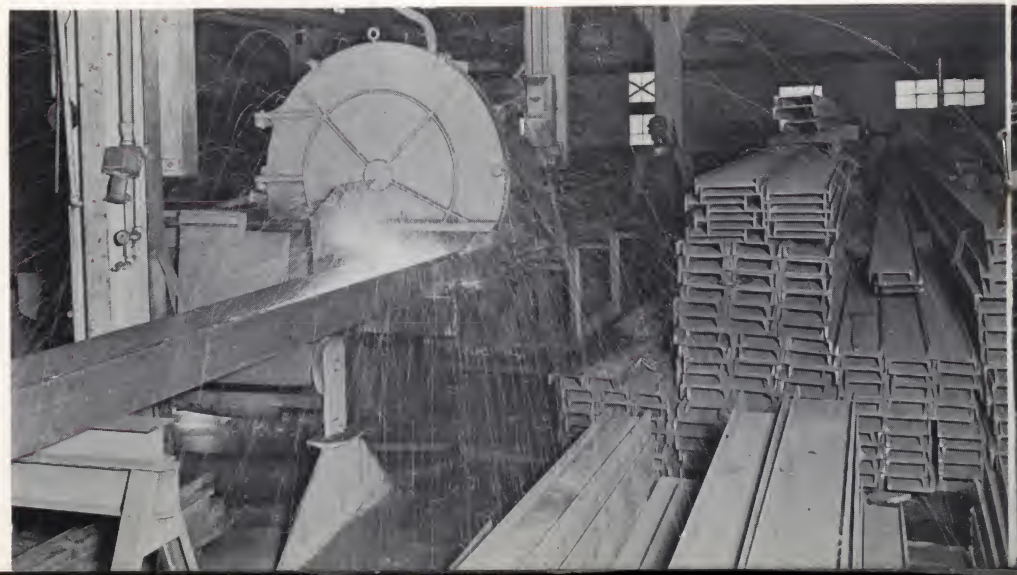

Highly efficient and accurate as one setup will process all sections which are to be duplicated.

The steel saws shown on the right are 52" in diameter, operate at 1750 rpm. and take up to 24" beams. This method of cutting to desired length is accurate and saves time over the old method of torch cutting.

MESKER FOR ECONOMY

**The name "Mesker" is synonymous with steel
...the basic commodity throughout the world.**

Mesker plant facilities occupy approximately 120,000 sq. ft. of floor area.

All fabrication of every description and all steel storage is under roof, thus enabling full production during all four seasons of the year.

All materials are handled by electric overhead cranes. Finished products, when rail shipment is required, are loaded on cars served by two inside rail spurs at opposite ends of plant.

In addition to rail shipment, our plant has four large loading areas for tractor-trailer trucking service.

To expedite shipment on rush jobs we maintain a fleet of trucks and trailers with a load capacity up to 18 tons, for delivery within a 200 mile radius of our plant.

Our Evansville plant is equipped for heavy structural fabricating, prefabricated sectional all metal buildings, miscellaneous and ornamental wrought iron work.

Mesker, at all times, carries in stock a large tonnage of various structural sections, which insures prompt delivery.

Mesker's experienced Engineering and Estimating-Sales Department, plus modern, up-to-date plant facilities insure accurate fabrication and quick delivery.

Some of the Major Customers MESKER HAS SERVED

Aluminum Company of America	Koppers Company, Inc.
Anaconda Copper Mining Company	National Supply Company
Ashland Oil & Refining Company	Neville Chemical Company
Atlanta Boat Works	Norge Division, Borg-Warner Company
Babcock & Wilcox Company	Ohio Oil Company
Blaw-Knox Company, Chemical Plants Div.	Pittsburgh Coal Company
Correct Craft, Inc.	R. J. Reynolds Tobacco Company
Crucible Steel Company of America	Singmaster & Breyer, Inc.
E. I. DuPont De Nemours & Company	Spencer Chemical Company
Ford Motor Company	Standard Oil of Indiana
Girdler Corporation	Sylvania Corporation
Harbison-Walker Refractories Company	The Texas Company
Jefferson Chemical Company	Union Carbide & Carbon Corporation
Jones & Laughlin Steel Corporation	United States Industrial Chemicals Corporation
	United States Steel Corporation
